FOREWORD

As was done last year, we are including a comparative statement of the past five years as we feel that this met with your approval. We are also, for the first time, noting some of the outstanding problems of the past year. These problems merit your attention.

(1). Proposed construction of a large flood control dam between Canaan Village and West Canaan by the U. S. Government. This proposal has been killed for the time being but will bear careful watching at all times.

(2). An over-loaded truck going through the side of Doten Bridge on the Dorchester road; the collapse of two other large bridges, and the practical collapse of several more.

(3). The appearance of a number of dangerous unguarded embankments where none were recognized as having existed in these locations in the past.

(4). The dispute of the Town's clear title to the Town House on Canaan Street should be cleared up for all time.

(5). Town Hall and other buildings. The heating system in the Town Building (the old K.P. Hall) has given considerable trouble this past year due mainly to the lack of properly trained servicemen. This has now been remedied. The roof on this building demands attention this spring. Repair or disposal of both the Precinct Building and the Bath House at the Public Wharf cannot be put off any longer with safety.

(6). Street Lights. Changes have been discussed with Public Service Officials, and are expected to improve the noticeably poor lighting which exists at present.

(7). As instructed, your Selectmen purchased a tract of land for use as a cemetery. This land borders on the southeast side of the present Wells Cemetery.

(8). Highways and Bridges. Including general expenses, equipment, new construction and improvements, T.R.A., Class V, bushes and unused, impassable roads that are still the responsibility of the town.

This particular department should be given much consideration prior to and at the annual Town Meeting where it is hoped that careful consideration and friendly discussion may reveal practical and economical ways to improve the service of this Department at a reasonable cost to the taxpayers.

If we, in presenting this report, have done so in a manner difficult to understand, we will do our best to answer any inquiries you wish to make. For further reference, the vouchers, receipted bills, etc., are on file at the Town Office together with the town books, and are open for your inspection.

We wish to pay sincere tribute to our Brother Selectman, "Herb" Day, and pray that he may regain his health and be with us once more.

The untimely death of Ward J. Neily, Road Agent in District No. 2, is noted with a feeling of deep regret.

We enter the new year with a definite feeling of optimism and a sincere request for your continued cooperation.

FOREST FIRE WARDEN'S REPORT

PREVENT FOREST FIRES—IT PAYS

We have been extremely fortunate during the past few years. Favorable fire weather and war time restrictions on travel which kept people off the highways and out of the woods have aided materially in reducing fire risks, keeping fires fewer and fire losses low.

We now face changed conditions. People can travel freely. Their love for travel and the freedom of the woods will bring them out in ever increasing numbers. This will step up the fire risks materially. The accelerated cutting of the war years has resulted in additional thousands of slash acres. These factors, combined with a possible dry season and human carelessness could easily produce a catastrophe. Everyone must, consequently, be on his guard. He should

1. Be careful with fire or when smoking in or near woodlands.
2. Cooperate with the local forest fire warden and his deputies by
 - a. Abiding cheerfully with whatever restrictions it may be necessary to impose. They are intended only to be helpful.
 - b. Securing permits to burn debris when the ground is not covered with snow.
 - c. Seeing that others comply with the requirements.
 - d. Promptly coming to the warden's assistance when needed.

If these few fundamental practices are followed it will be possible to PREVENT a large proportion of FOREST FIRES from starting—that PAYS!

GEORGE L. EGGLESTON,

Forest Fire Warden.

Superintendent's Report 1945-46

One of the many varied duties of a superintendent of schools is, I believe, to attempt to maintain the best schools possible, to point the way for the improvement of the schools, to accept the verdict of the voting public and to spend the tax dollar as economically and thriftily as humanly possibly. The first part of the above sentence aims at ideals: the last part must be the practice.

The big question before the people of Canaan and those in the adjoining towns in some cases, is to decide what they want to offer the children of Canaan in comparison with other towns of like size and wealth. This of course concerns a building program and the offerings to be made with a new building, and even with the old. It is extremely doubtful if anyone has all the answers to these difficult problems; the solutions of these questions, as with all problems in a democracy, must be the result of many people working, studying, talking, meeting, arguing, doing some research on the question, and eventually arriving at a conclusion. As we know the solution to any building program for the average sized town will probably involve other and bigger governmental agencies; in fact many of the educational problems of our smaller towns will not be solved without considerable help from state and federal government because of the elementary fact that such agencies have sources of the tax dollar other than real estate and property. A nation which can win a war must lick its educational problems, among others, to survive the peace. Who would not like 278 billion dollars for a peace time economy? To summarize the above is to say that Canaan is not offering to its pupils what other towns of similar size are doing; we all owe the problems the benefit of our best efforts. The solutions of this problem as a whole must be the decisions arrived at by many after much hard work. It is the belief of the writer that people usually get what they want in the long run even though it takes a long time. What do we in Canaan want to offer the pupils in this area?

Ideally Canaan would have a new building, housing all 12 grades, with facilities for some sort of vocational studies for both boys and girls, a gymnasium-auditorium designed for community use, provisions for serving hot lunches to pupils transported, definite pro-

vision for educational and vocational guidance for all pupils, provisions for greater health facilities, a tuition rate attractive to neighboring towns, and money in the till to keep well trained and progressive teachers for a period of years.

It is my opinion that such a school system, or one approximating it, would be a sound investment in all ways; it would be a good advertisement to those interested in settling in New Hampshire towns; it might be an incentive for someone to locate a small industry in Canaan as is being done in small towns throughout the country; perhaps some of our visiting tourists would be interested in living in this area the year around; it might spell community progress. The alternative to this may be educational and community decadence.

This report has been confined to the most pressing need of the year; there are, of course, other problems as there must always be in a living society. If I can be of any assistance at any time in any way I will be pleased to contribute as much as I can.

Respectfully Submitted,

C. MAURICE GRAY.
